FLEET RULES

- Fighter Replacements** — Any ship carrying one or more Thorun Dartfighter flights may replace any number of them with Thorun Torpedofighter flights or Breaching Pods. Breaching Pods taken this way carry one Troop from the parent ship and do not include Troops of their own.
- Fighter Support** — A Dilgar fighter flight may support a dogfight within 2 inches as though in base contact, provided the Dilgar flight in the dogfight moved into contact with the enemy this turn. A supporting flight may not attack normally and counts as involved in the dogfight.
- Pentacon Formations** — Dilgar ships may form squadrons of up to five ships. A five-ship Pentacon may, once per turn when selected to move, force an enemy ship to move instead. The Pentacon must still move before the turn ends. At three or fewer ships it becomes a normal squadron.
- Suicide Fighters** — In battles set in 2232, a Thorun Dartfighter flight may move into contact with an enemy ship and intentionally crash. The flight is destroyed at the start of the Attack Phase and awards no Victory Points; the target suffers a 1 AD attack with Super AP and Triple Damage.

TRAITS AND WEAPON RULES

- Anti-Fighter** — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

AP — Add +1 to every Attack Dice result rolled for this weapon.
- Double Damage** — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Orbital Bomb — May be fired only at planetary targets and may attack emplacements and/or troops.

Shuttles — The listed score is the number of Troops this ship may land on a planet in one turn during a planetary assault.
