Ship Rules Reference

FLEET RULES

Fighter Replacements — Any ship carrying one or more Aurora Starfury flights may replace any number of them with Badgers, Thunderbolts, where the scenario date permits, or Breaching Pods. Breaching Pods taken this way carry one Troop from the parent ship and do not include Troops of their own.

TRAITS AND WEAPON RULES

Anti-Fighter — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

Command — While this ship is on the table and is neither Crippled nor reduced to a Skeleton Crew, add its Command score to the fleet's Initiative. Command bonuses are not cumulative.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Interceptors — Against the first incoming hit of the turn, roll a number of dice equal to the Interceptor score; any result of 2+ cancels that hit. Successful dice are rolled against the next hit needing 3+, then 4+, and so on. Failed dice are discarded. Once the required number reaches 6+, it remains 6+ for the rest of the turn. Interceptors refresh at the start of the next turn.

Jump Engine — The ship may use the Initiate Jump Point! Special Action to enter or leave hyperspace. Follow the hyperspace and jump-point rules when placing the jump point, checking for deviation, and moving ships through it.

Lumbering — The ship may make only one turn during its movement, regardless of the number of turns shown in its profile.

Scout — At the start of the Attack Phase, a Scout within 36 inches may pass a Crew Quality check of 8+ to reduce one target's Stealth by 1 for the turn, or to let one non-Beam, non-Energy Mine, non-Twin-Linked weapon system attacking that target re-roll all failed Attack Dice.

Twin-Linked — Any Attack Dice from this weapon that fail to hit may be re-rolled.
