Ship Rules Reference

FLEET RULES

- Crew** — Shadow vessels have no Crew or Troops score. They cannot be boarded or initiate boarding actions and ignore all critical hits that affect Crew.
- Hyperspace Mastery** — Shadow vessels enter realspace without deviation, without an allied ship already on the table, and without causing jump point shock-wave damage. They may act normally on the turn they arrive. To enter hyperspace they use Initiate Jump Point! but place no jump point; remove the vessel at the start of its next turn. Shadow fighters may enter or leave hyperspace the same way without taking a Special Action.
- Jump Point Disruptor** — A Shadow Ship may use its Jump Point Disruptor instead of firing other weapons. Select a jump point leading to hyperspace within 18 inches; it closes immediately. Each ship that used it this turn, or lies within 4 inches of its forward arc, rolls one die: on 1 it suffers 3d6 Damage; on 2-3 it suffers 1d6 critical hits with all Damage tripled; on 4-6 it is destroyed. Auxiliary craft are destroyed on 2+.
- Redundant Systems** — Shadow vessels take damage normally, but automatically repair all critical hits, including Vital Systems criticals, in the End Phase of the following turn.
- Special Actions** — Shadow vessels may use only Initiate Jump Point! and Run Silent!
- Superb Manoeuvrability** — Shadow Ships and Shadow Scouts may use normal Super-Manoeuvrability or instead turn up to 90 degrees at the start of movement and then move up to twice Speed in a straight line.
- Superior Technology** — Shadow vessels receive +1 on rolls made to overcome an enemy ship's Stealth.

TRAITS AND WEAPON RULES

- Accurate** — This weapon ignores the target's Dodge score.

Atmospheric — This ship may enter a planetary atmosphere and take part in planetary assaults, including attacking ground targets and landing troops where the relevant rules allow.

Dodge — Whenever the ship suffers a hit, roll one die. If the result equals or exceeds its Dodge score, ignore the attack completely. A ship that is Adrift, unable to move, or did not move in the Movement Phase cannot use Dodge. Dodge does not protect against Energy Mines or Jump Points.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Scout — At the start of the Attack Phase, a Scout within 36 inches may pass a Crew Quality check of 8+ to reduce one target's Stealth by 1 for the turn, or to let one non-Beam, non-Energy Mine, non-Twin-Linked weapon system attacking that target re-roll all failed Attack Dice.
- Self-Repair** — In the End Phase, regain Damage equal to the listed Self-Repair score, up to the ship's starting Damage. A ship that has become Crippled remains Crippled even if later repairs take it above the threshold.

Shields — The first value is the number of hits the shield can absorb. Double, Triple, and Quad Damage hits remove 2, 3, or 4 shield points. Excess hits pass to the hull. The second value is regenerated automatically in each End Phase. Shields cease functioning while the ship is Crippled.

Stealth — After declaring attacks against this ship, the attacker must roll at least the listed Stealth score to lock on. Apply the normal modifiers for range, Scouts, and other effects. If the lock-on roll fails, those weapons may not attack another target.

Super AP — Add +2 to every Attack Dice result rolled for this weapon.
