Ship Rules Reference

SHIP NAME _____

FLEET RULES

- Assault Drones** — When Gaim Troops attack during a boarding action or planetary assault, roll two dice for each attack and use the better result.
- Dynamic Squadrons** — Gaim ships need not form squadrons before the battle. At the start of a Movement Phase, eligible ships may declare a squadron. It may remain together or disband in any End Phase.
- Klikkita Conversion** — A Klikkita flight may convert into a Klikkitak flight in any End Phase, whether launched or still aboard its parent ship. The change is permanent. Klikkitaks cannot intercept fighters or Breaching Pods and cannot be recovered by Fleet Carrier if destroyed.
- Protect the Queen** — If all Queen ships are lost, every remaining Gaim ship immediately suffers -4 Crew Quality and the fleet Initiative becomes -3. Enemy players receive double the normal Victory Points for destroying a Queen ship.
- The Queens** — Every Gaim fleet must include at least one Queen ship. The Queen of the highest Priority Level is the Ruling Queen, and only one Queen of that type may be present. The Ruling Queen receives +1 Crew Quality. Each Gaim ship uses the Crew Quality of the nearest Queen within 12 inches.

TRAITS AND WEAPON RULES

- Anti-Fighter** — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

Beam — This weapon always hits on a roll of 4 or more, regardless of Hull. Each successful Attack Dice is rolled again and may continue scoring additional hits while it keeps rolling 4 or more. Beam weapons ignore Interceptors and may split fire only between targets within 4 inches of one another.

Carrier — The ship may launch or recover a number of fighter flights in a turn equal to its Carrier score, instead of the normal limit of one flight.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.
- Interceptors** — Against the first incoming hit of the turn, roll a number of dice equal to the Interceptor score; any result of 2+ cancels that hit. Successful dice are rolled against the next hit needing 3+, then 4+, and so on. Failed dice are discarded. Once the required number reaches 6+, it remains 6+ for the rest of the turn. Interceptors refresh at the start of the next turn.

Jump Engine — The ship may use the Initiate Jump Point! Special Action to enter or leave hyperspace. Follow the hyperspace and jump-point rules when placing the jump point, checking for deviation, and moving ships through it.

Shuttles — The listed score is the number of Troops this ship may land on a planet in one turn during a planetary assault.
