TARA’LIN-CLASS COMMAND WAR CRUISER (SHARLIN VARIANT)

Initiative: +2

Ship Rules Reference

SHIP NAME _____

FLEET RULES

Allied Fleets — An ISA fleet may spend 1 Fleet Allocation Point from its allowance on ships from one of the following fleet lists: Earth Alliance (Third Age or Crusade Era), Narn Regime, Minbari Federation, or any League fleet. In campaign games, allied ships are limited to a maximum of 1 Battle-level Fleet Allocation Point at any one time.

Fighter Replacements — Any ship carrying one or more Starfury flights may replace any number of them with Thunderbolt Starfury flights.

In Service Dates — The Interstellar Alliance fleet list may not be used in scenarios set before 2262, even though some individual ships existed earlier.

Rangers — All ISA ships receive +1 Crew Quality, to a maximum score of 6.

Skin Dancing — Blue Stars, White Stars, White Star IIs, White Star Fighters, and all Minbari fighters may attempt Skin Dancing. Move into contact with the target; close escorts may intercept normally. Ships must pass a Crew Quality check of 9, while fighters must roll 5+. On a failure, the attacker is destroyed and the target suffers a Double Damage attack: 1 AD for a fighter, or AD equal to the ship's starting Damage for a ship. On success, the attacker may attack only that target for the rest of the turn, may use all weapons regardless of fire arc, and ignores Interceptors. The target may not fire back; other enemies may target the skin-dancing craft only with Accurate or Precise weapons.

TRAITS AND WEAPON RULES

Advanced Anti-Fighter — Use the normal Anti-Fighter rules, but add +1 to every Anti-Fighter die roll.

Advanced Jump Engine — When this ship enters realspace, its jump point does not deviate and it may act normally that turn. A jump point created in realspace may be placed in any fire arc. Other arriving ships may act normally only if they also have Advanced Jump Engine.

Beam — This weapon always hits on a roll of 4 or more, regardless of Hull. Each successful Attack Dice is rolled again and may continue scoring additional hits while it keeps rolling 4 or more. Beam weapons ignore Interceptors and may split fire only between targets within 4 inches of one another.

Command — While this ship is on the table and is neither Crippled nor reduced to a Skeleton Crew, add its Command score to the fleet's Initiative. Command bonuses are not cumulative.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Flight Computer — Crew Quality can never fall below 4. The ship ignores all penalties for being reduced to a Skeleton Crew, except that Troops are still halved and Fleet Carrier is still lost.

Lumbering — The ship may make only one turn during its movement, regardless of the number of turns shown in its profile.

Mini-Beam — Always hits on a roll of 4 or more regardless of Hull and ignores Interceptors. Unlike a Beam weapon, successful Attack Dice are not rolled again for additional hits.

Precise — Add +1 to every roll made on the Attack Table for this weapon.

Stealth — After declaring attacks against this ship, the attacker must roll at least the listed Stealth score to lock on. Apply the normal modifiers for range, Scouts, and other effects. If the lock-on roll fails, those weapons may not attack another target.
