FLEET RULES

- Fighter Replacements** — Any ship carrying one or more Thorun Dartfighter flights may replace any number of them with Thorun Torpedofighter flights or Breaching Pods. Breaching Pods taken this way carry one Troop from the parent ship and do not include Troops of their own.
- Fighter Support** — A Dilgar fighter flight may support a dogfight within 2 inches as though in base contact, provided the Dilgar flight in the dogfight moved into contact with the enemy this turn. A supporting flight may not attack normally and counts as involved in the dogfight.
- Pentacon Formations** — Dilgar ships may form squadrons of up to five ships. A five-ship Pentacon may, once per turn when selected to move, force an enemy ship to move instead. The Pentacon must still move before the turn ends. At three or fewer ships it becomes a normal squadron.
- Suicide Fighters** — In battles set in 2232, a Thorun Dartfighter flight may move into contact with an enemy ship and intentionally crash. The flight is destroyed at the start of the Attack Phase and awards no Victory Points; the target suffers a 1 AD attack with Super AP and Triple Damage.

TRAITS AND WEAPON RULES

- Anti-Fighter** — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

AP — Add +1 to every Attack Dice result rolled for this weapon.

Carrier — The ship may launch or recover a number of fighter flights in a turn equal to its Carrier score, instead of the normal limit of one flight.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.
- Fleet Carrier** — May deploy up to half its carried flights before battle. While operational, all fighter flights in the fleet gain +1 Dogfight. When a friendly fighter within 30 inches is removed, roll 5+ to recover it for relaunch next turn; apply -1 if an enemy ship was within 4 inches or it was lost in a dogfight, and +1 if within 10 inches of the carrier. Only craft the carrier could normally carry may be recovered. All benefits are lost if the carrier is Crippled or on Skeleton Crew.

Jump Engine — The ship may use the Initiate Jump Point! Special Action to enter or leave hyperspace. Follow the hyperspace and jump-point rules when placing the jump point, checking for deviation, and moving ships through it.

Lumbering — The ship may make only one turn during its movement, regardless of the number of turns shown in its profile.
