Ship Rules Reference

FLEET RULES

Assault Drones — When Gaim Troops attack during a boarding action or planetary assault, roll two dice for each attack and use the better result.

Dynamic Squadrons — Gaim ships need not form squadrons before the battle. At the start of a Movement Phase, eligible ships may declare a squadron. It may remain together or disband in any End Phase.

Klikkita Conversion — A Klikkita flight may convert into a Klikkitak flight in any End Phase, whether launched or still aboard its parent ship. The change is permanent. Klikkitaks cannot intercept fighters or Breaching Pods and cannot be recovered by Fleet Carrier if destroyed.

Protect the Queen — If all Queen ships are lost, every remaining Gaim ship immediately suffers -4 Crew Quality and the fleet Initiative becomes -3. Enemy players receive double the normal Victory Points for destroying a Queen ship.

The Queens — Every Gaim fleet must include at least one Queen ship. The Queen of the highest Priority Level is the Ruling Queen, and only one Queen of that type may be present. The Ruling Queen receives +1 Crew Quality. Each Gaim ship uses the Crew Quality of the nearest Queen within 12 inches.

TRAITS AND WEAPON RULES

Anti-Fighter — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

AP — Add +1 to every Attack Dice result rolled for this weapon.

Carrier — The ship may launch or recover a number of fighter flights in a turn equal to its Carrier score, instead of the normal limit of one flight.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Energy Mine — Choose a point in range and in the weapon's fire arc. Every object within 3 inches is attacked automatically. The attack ignores Interceptors and Dodge, converts all Critical Hits to Solid Hits, and may not be split.

Flight Computer — Crew Quality can never fall below 4. The ship ignores all penalties for being reduced to a Skeleton Crew, except that Troops are still halved and Fleet Carrier is still lost.

Interceptors — Against the first incoming hit of the turn, roll a number of dice equal to the Interceptor score; any result of 2+ cancels that hit. Successful dice are rolled against the next hit needing 3+, then 4+, and so on. Failed dice are discarded. Once the required number reaches 6+, it remains 6+ for the rest of the turn. Interceptors refresh at the start of the next turn.

Jump Engine — The ship may use the Initiate Jump Point! Special Action to enter or leave hyperspace. Follow the hyperspace and jump-point rules when placing the jump point, checking for deviation, and moving ships through it.

Lumbering — The ship may make only one turn during its movement, regardless of the number of turns shown in its profile.

Slow-Loading — This weapon may fire only every other turn. If it fails to lock on to a Stealth target, it does not count as fired.
