Ship Rules Reference

FLEET RULES

Allied Fleets — An ISA fleet may spend 1 Fleet Allocation Point from its allowance on ships from one of the following fleet lists: Earth Alliance (Third Age or Crusade Era), Narn Regime, Minbari Federation, or any League fleet. In campaign games, allied ships are limited to a maximum of 1 Battle-level Fleet Allocation Point at any one time.

Fighter Replacements — Any ship carrying one or more Starfury flights may replace any number of them with Thunderbolt Starfury flights.

In Service Dates — The Interstellar Alliance fleet list may not be used in scenarios set before 2262, even though some individual ships existed earlier.

Rangers — All ISA ships receive +1 Crew Quality, to a maximum score of 6.

Skin Dancing — Blue Stars, White Stars, White Star IIs, White Star Fighters, and all Minbari fighters may attempt Skin Dancing. Move into contact with the target; close escorts may intercept normally. Ships must pass a Crew Quality check of 9, while fighters must roll 5+. On a failure, the attacker is destroyed and the target suffers a Double Damage attack: 1 AD for a fighter, or AD equal to the ship's starting Damage for a ship. On success, the attacker may attack only that target for the rest of the turn, may use all weapons regardless of fire arc, and ignores Interceptors. The target may not fire back; other enemies may target the skin-dancing craft only with Accurate or Precise weapons.

TRAITS AND WEAPON RULES

Adaptive Armour — Halve the Damage and Crew loss caused by each separate attack, rounding down to a minimum loss of 1. Each weapon system or other single source counts as a separate attack.

Advanced Jump Engine — When this ship enters realspace, its jump point does not deviate and it may act normally that turn. A jump point created in realspace may be placed in any fire arc. Other arriving ships may act normally only if they also have Advanced Jump Engine.

Afterburner — When using the All Power to Engines! Special Action, this ship doubles its Speed for the turn instead of receiving the normal increase.

Anti-Fighter — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.

Beam — This weapon always hits on a roll of 4 or more, regardless of Hull. Each successful Attack Dice is rolled again and may continue scoring additional hits while it keeps rolling 4 or more. Beam weapons ignore Interceptors and may split fire only between targets within 4 inches of one another.

Carrier — The ship may launch or recover a number of fighter flights in a turn equal to its Carrier score, instead of the normal limit of one flight.

Command — While this ship is on the table and is neither Crippled nor reduced to a Skeleton Crew, add its Command score to the fleet's Initiative. Command bonuses are not cumulative.

Flight Computer — Crew Quality can never fall below 4. The ship ignores all penalties for being reduced to a Skeleton Crew, except that Troops are still halved and Fleet Carrier is still lost.

Interceptors — Against the first incoming hit of the turn, roll a number of dice equal to the Interceptor score; any result of 2+ cancels that hit. Successful dice are rolled against the next hit needing 3+, then 4+, and so on. Failed dice are discarded. Once the required number reaches 6+, it remains 6+ for the rest of the turn. Interceptors refresh at the start of the next turn.

Mini-Beam — Always hits on a roll of 4 or more regardless of Hull and ignores Interceptors. Unlike a Beam weapon, successful Attack Dice are not rolled again for additional hits.

Precise — Add +1 to every roll made on the Attack Table for this weapon.

Quad Damage — Quadruple all Damage caused. A Bulkhead Hit still causes at least 2 points of Damage.

Triple Damage — Triple all Damage caused. A Bulkhead Hit still causes at least 1 point of Damage.

Twin-Linked — Any Attack Dice from this weapon that fail to hit may be re-rolled.
