Initiative: +2

Ship Rules Reference

FLEET RULES

Allied Fleets — An ISA fleet may spend 1 Fleet Allocation Point from its allowance on ships from one of the following fleet lists: Earth Alliance (Third Age or Crusade Era), Narn Regime, Minbari Federation, or any League fleet. In campaign games, allied ships are limited to a maximum of 1 Battle-level Fleet Allocation Point at any one time.

Fighter Replacements — Any ship carrying one or more Starfury flights may replace any number of them with Thunderbolt Starfury flights.

In Service Dates — The Interstellar Alliance fleet list may not be used in scenarios set before 2262, even though some individual ships existed earlier.

Rangers — All ISA ships receive +1 Crew Quality, to a maximum score of 6.

Skin Dancing — Blue Stars, White Stars, White Star IIs, White Star Fighters, and all Minbari fighters may attempt Skin Dancing. Move into contact with the target; close escorts may intercept normally. Ships must pass a Crew Quality check of 9, while fighters must roll 5+. On a failure, the attacker is destroyed and the target suffers a Double Damage attack: 1 AD for a fighter, or AD equal to the ship's starting Damage for a ship. On success, the attacker may attack only that target for the rest of the turn, may use all weapons regardless of fire arc, and ignores Interceptors. The target may not fire back; other enemies may target the skin-dancing craft only with Accurate or Precise weapons.

TRAITS AND WEAPON RULES

Accurate — This weapon ignores the target's Dodge score.

Adaptive Armour — Halve the Damage and Crew loss caused by each separate attack, rounding down to a minimum loss of 1. Each weapon system or other single source counts as a separate attack.

Advanced Jump Engine — When this ship enters realspace, its jump point does not deviate and it may act normally that turn. A jump point created in realspace may be placed in any fire arc. Other arriving ships may act normally only if they also have Advanced Jump Engine.

Agile — The ship need only move one quarter of its Speed in a straight line before making its first turn, and only 1 inch before making each subsequent turn.

AP — Add +1 to every Attack Dice result rolled for this weapon.

Beam — This weapon always hits on a roll of 4 or more, regardless of Hull. Each successful Attack Dice is rolled again and may continue scoring additional hits while it keeps rolling 4 or more. Beam weapons ignore Interceptors and may split fire only between targets within 4 inches of one another.

Command — While this ship is on the table and is neither Crippled nor reduced to a Skeleton Crew, add its Command score to the fleet's Initiative. Command bonuses are not cumulative.

Dodge — Whenever the ship suffers a hit, roll one die. If the result equals or exceeds its Dodge score, ignore the attack completely. A ship that is Adrift, unable to move, or did not move in the Movement Phase cannot use Dodge. Dodge does not protect against Energy Mines or Jump Points.

Double Damage — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.

Flight Computer — Crew Quality can never fall below 4. The ship ignores all penalties for being reduced to a Skeleton Crew, except that Troops are still halved and Fleet Carrier is still lost.

Precise — Add +1 to every roll made on the Attack Table for this weapon.

Scout — At the start of the Attack Phase, a Scout within 36 inches may pass a Crew Quality check of 8+ to reduce one target's Stealth by 1 for the turn, or to let one non-Beam, non-Energy Mine, non-Twin-Linked weapon system attacking that target re-roll all failed Attack Dice.

Self-Repairing — Add +1 to all Damage Control checks. In each End Phase while below starting Damage, regain Damage equal to the Self-Repairing score, up to the starting total. Once Crippled, the ship remains Crippled even if repaired above the threshold.

Triple Damage — Triple all Damage caused. A Bulkhead Hit still causes at least 1 point of Damage.
