Ship Rules Reference

FLEET RULES

- Best of the Best** — All ships in a Psi Corps fleet receive +1 Crew Quality, to a maximum score of 6.
- EarthForce Requisition** — A Psi Corps fleet may spend up to 2 Fleet Allocation Points from its allowance on ships from one Earth Alliance fleet list.

TRAITS AND WEAPON RULES

- Advanced Jump Engine** — When this ship enters realspace, its jump point does not deviate and it may act normally that turn. A jump point created in realspace may be placed in any fire arc. Other arriving ships may act normally only if they also have Advanced Jump Engine.
- Anti-Fighter** — When an enemy fighter flight moves into base contact, roll a number of Attack Dice equal to the Anti-Fighter score before the dogfight is resolved. Each die that rolls 4 or more destroys the fighter flight. Anti-Fighter may be used once per turn.
- AP** — Add +1 to every Attack Dice result rolled for this weapon.
- Beam** — This weapon always hits on a roll of 4 or more, regardless of Hull. Each successful Attack Dice is rolled again and may continue scoring additional hits while it keeps rolling 4 or more. Beam weapons ignore Interceptors and may split fire only between targets within 4 inches of one another.
- Double Damage** — Double all Damage caused, including bonus Damage from Critical Hits. A Bulkhead Hit still causes 1 point of Damage.
- Flight Computer** — Crew Quality can never fall below 4. The ship ignores all penalties for being reduced to a Skeleton Crew, except that Troops are still halved and Fleet Carrier is still lost.

- Interceptors** — Against the first incoming hit of the turn, roll a number of dice equal to the Interceptor score; any result of 2+ cancels that hit. Successful dice are rolled against the next hit needing 3+, then 4+, and so on. Failed dice are discarded. Once the required number reaches 6+, it remains 6+ for the rest of the turn. Interceptors refresh at the start of the next turn.
- Lumbering** — The ship may make only one turn during its movement, regardless of the number of turns shown in its profile.
- Mini-Beam** — Always hits on a roll of 4 or more regardless of Hull and ignores Interceptors. Unlike a Beam weapon, successful Attack Dice are not rolled again for additional hits.
- Self-Repairing** — Add +1 to all Damage Control checks. In each End Phase while below starting Damage, regain Damage equal to the Self-Repairing score, up to the starting total. Once Crippled, the ship remains Crippled even if repaired above the threshold.
- Shields** — The first value is the number of hits the shield can absorb. Double, Triple, and Quad Damage hits remove 2, 3, or 4 shield points. Excess hits pass to the hull. The second value is regenerated automatically in each End Phase. Shields cease functioning while the ship is Crippled.
- Triple Damage** — Triple all Damage caused. A Bulkhead Hit still causes at least 1 point of Damage.
- Twin-Linked** — Any Attack Dice from this weapon that fail to hit may be re-rolled.
